SUMMARY

You have reviewed the capabilities of our company and our proven performance with current and past customers

IPC can accomplish all your operational and project requirements on time and on budget

IPC is YOUR BEST VALUE SELECTION

Thank you

Performance Letter

8 November 2009

MEMORADUM

TO WHOM IT MAY CONCERN

SUBJECT: Project Management Company (PMC), O&M Performance letter

This Performance letter is written to attest to the Projects Management Company (PMC) managing of the O&M contract for DynCorp International from 1 August 2008 to present.

PMC's performance has been outstanding throughout the contract period. The Managers, Supervisors and the onsite workers have always displayed a can do attitude, always able and willing to do what is necessary to get the job done.

PMC had 30 days to mobilize at the start-up, and through their s efforts and their aggressive management approach, they were able to mobilize on all 15 camps throughout the Iraqi theater of operation in a total of 16 days, this enabled us to start providing first class service to the customer on the very first day.

The supplies and materials have routinely made it to the camps on time; this is no small tasks when taking into consideration the area's that has to be travelled.

I am confident that PMC will do the best job possible for any client in any area, I am extremely pleased to have worked with PMC.

STAN BURTON
Contract Manager

January 8, 2007

Subject: Subcontractor Performance - Balad Iraq (Anaconda)

To Whom It May Concern

Integrated Projects Company (IPC) was awarded several subcontracts for life support services at Anaconda Air Base, Balad Iraq from January 2004 through Oct 2004. Services consisted of trash pickup services, potable water delivery, black and gray water removal, latrine, and shower cleaning, grounds keepers, and fuel depot labor.

IPC provided state of the art equipment and was able to mobilize equipment and personnel in a short period of time ensuring continuity of services from previous subcontractor. They even went as far as making sure that replacement equipment was on hand to eliminate any possibilities of disruption services.

IPC was able to increase workload immediately upon request whenever there was a surge in personnel.

The subcontractor performed services in an outstanding manner with minor problems for which corrective actions taken by the subcontractor were highly effective.

Betty Hayes
Sr. Manager, Procurement
